

**Test Equipment
You Can Count On!**

**Is your scale
service provider
equipped to meet
the new standards?**

**LSI is certified in
Wisconsin, Iowa &
Minnesota!**

The State of Wisconsin passed a new law in 2006 that requires all truck scale calibrations to be performed with “mechanized test weights.” Is your current scale service provider equipped to meet these standards?

- La Crosse Scale, Inc., has been meeting this Wisconsin requirement using (2) 10,000 lb. mobile carts for over a decade... providing a superior test. (Other companies simply load 20,000 lbs. of weights on one end of your scale platform.)
- LSI is state certified in Iowa, Minnesota and Wisconsin.
- Our equipment is state of the art. We run a 2006 International Heavy capacity truck, equipped w/generator, telescopic boom, and a large inventory of mechanical and electronic parts to provide your operations quick uptime.

Knowledgeable & Responsive Service Team

- La Crosse Scale, Inc. is celebrating over 58+ years in business!
- Our staff of professional testing and calibration technicians are accredited to ISO 17025 international standards, guaranteeing technical competence and conformance to the highest quality system standards.
- Technical expertise with the training and experience you need – from Vehicle scales to Analytical balances.
- Traceable testing equipment for professional service and accurate reporting provided in a timely manner for your internal records.
- LSI technicians are not only on site to assure the accuracy of your scales, and minimize your downtime... they are your partners in providing solutions — to recommend improvements in your process based on their knowledge and expertise.
