

BackTrack®

Custom Tracking Solutions

If you need to find out where it is,
what it is used for, or who used it,
BackTrack is the answer!

Whether you implement data tracking solutions for multiple clients or develop departmental solutions for your own company, BackTrack can help you save time and increase efficiency. BackTrack's full feature development environment lets you create tracking applications tailored to meet specific business needs. With BackTrack, you can increase productivity and reduce costs through management of common data collection tasks.

BackTrack Lets You ...

- **Track** the exact location, movement, and usage of any item accurately and efficiently.
- **Create** multiple tracking applications from a single developer program.
- **Utilize** pre-designed applications to deliver cost-effective tracking solutions.
- **Modify** database structures with ease.
- **Import** and export multiple data formats.
- **Configure** macro buttons for operation of one-touch reports, labels and commands.
- **Build** custom reports and labels quickly and easily.

[DATABASES]

BackTrack's five databases are the key to creating flexible tracking applications.

User Database - Stores information about the authorized users of the BackTrack application. Includes an unlimited number of records and up to 60 user-defined fields with character, numeric, date and logical data types.

Item Database - Houses items to be tracked and information on the items. Includes up to 60 user-defined fields. Descriptions, lengths and data types can be set using character, numeric, date, logical and mathematical data types.

Location Database - Allows the application developer to add information on any number of locations in which items are kept.

Transaction Database - Keeps track of all item activity including the item's history and reservation status. Add up to ten user-defined fields to keep tabs on usage activity within an application.

Relationship Database - Allows developers to internally link items to a location or another item, making it easy to check out and track groups of related items.

Database Functions

- Ability to archive out-of-date activity or items
- Data purge and re-index options
- Simple data transfer/manipulation via keyboard or portable data collection unit
- Easy housekeeping including database backup, archiving and rebuilding
- Import/export popular data formats

ASCII (Comma, space & tab delimited)
DBF (dBase III, dBase IV)
DIF (Data Interchange Format)
FW2 (Framework II)
MOD (Microsoft Multiplan)
PDOC (Paradox)

RPD (RapidFile 1.2)
SDF (System Data Format)
SYLK (Symbolic Link Datachange)
WK1, WK3, WKS (Lotus1-2-3)
WR1, WRK (Lotus Symphony)
XLS (MS Excel 2.0, 3.0, 4.0, 5.0)

[LABEL DESIGNER]

BackTrack's integrated label designer enables you to build labels unique to a business or application. The program's label designer includes dozens of features from StrandWare's award-winning Label Matrix bar code label design and printing program.

- True WYSIWYG design and editing
 - Label design, printing and database wizards
 - Label design error and warning tools
 - Comprehensive on-line help
 - Unlimited graphics and fields per label
 - Over 25 bar code types
 - Process color support for select thermal printers
 - 450+ custom drivers for maximum printing speed and performance
 - Support for over 40 thermal printer manufacturers including Datamax, Eltron, Meto, Monarch, Sato, TEC, Zebra and more. Support for any Windows driver including Epson, Hewlett Packard, IBM and more.
- { Visit www.strandware.com for a complete list of printers supported }

[PORTABLE DATA TERMINALS]

Even remote tracking is a snap with BackTrack. The program's integrated portable data terminal (PDT) support allows users to add items and perform physical inventory activities – wherever they are. Using a PDT with Backtrack you can perform Check In/Check Out, Take Out/Restock and Move functions. Additional five-user PDT add-on licenses are available, allowing you to load a specific application on five separate PDTs.

[REPORT DESIGNER]

BackTrack's internal report writer provides unlimited reporting capabilities. Create, edit and print professional reports using selected criteria. BackTrack's report wizard simplifies the process by helping users through each step of report generation.

- Easy-to-use Report Wizard
- Advanced report editor
- Pre-defined reports
- Multiple report layouts and font options
- Detailed or summary reports
- Sort or order items and fields
- Select records from any BackTrack database
- Assemble and count multiple items with grouping option
- Perform field summation and other mathematical functions

[APPLICATION TEMPLATES]

There's no need to start from scratch. BackTrack includes several ready-to-use templates for common tracking applications. Use the templates as-is, or modify them to meet your exact business tracking needs. BackTrack's application templates save valuable development time, eliminating much of the expense incurred in custom programming.

Current templates include:

- Archival/Off-Site Storage
- Capital Asset Tracking
- Collections
- Document & File Tracking
- Equipment Tracking
- General Inventory
- Human Resources Files
- Libraries
- Tool Tracking

Look for new templates on our web site
www.backtrackgroup.com

Unlimited Applications

BackTrack lets you check items in and out, move items, capture and maintain physical inventory, control assets, track resources and more. BackTrack's flexibility makes it possible to create tracking solutions for virtually any industry. There are no limits to the number or type of tracking applications that can be created with BackTrack.

Archival & Storage	ISO 9000 Tracking	Resource Library
Collectibles Tracking	Lot Tracking	Reusable Services
Corporate Libraries	Maintenance Tracking	Revisions Tracking
Delivery Services	Off-Site Storage	Safety Inspections
Document / File Tracking	Parts Inventory	Service Billing
Field Service Tracking	Perishable Distribution	Time & Usage
Fixed Asset Tracking	Perishable Usage	Tools & Equipment
Human Resources	Records Tracking	Work Order Tracking
Inventory Control	Rental Tracking	

System Requirements

IBM compatible 486 or better
Win95, Win98 or NT4.0
16Mb RAM minimum for Win95
32Mb RAM minimum for Win98
64Mb RAM minimum for NT4.0 or Win2000
15Mb hard disk space
Windows-compatible monitor and graphics card
