* Scales ≤ 17’6” will have a capacity of 120,000 lb

Truckmate CD scales are designed and factory built to give you the years of reliable service that you expect from Mettler Toledo. The composite design of its weighbridge uses concrete and steel, each to its best advantage...steel in tension and concrete in compression. Maximum efficiency in materials and strength, the bottom pan is a structural member, not just shoring for the concrete. Internally full length formed L-beams combine with the concrete and work in combination for minimum deflection and long life.

Precision assembly fixtures and robots assure you that every module is fabricated to the highest manufacturing standard, each and every time. Completed modules are shot blasted and painted in our factory-controlled environment for a durable, long-lasting finish.

Our pour-in-place design is easy to install. If you choose, our unique delivery trucks and trained technician/drivers are equipped to make the installation at delivery, or you can do it at your convenience. Easy to maintain, all serviceable components can be accessed from the top of the scale. For pit installations, manholes can be added, providing full access.

Options include side rails to guide trucks over the scale, and multi-axle configurations.

ISO 9001

This product was developed, produced and tested in a METTLER TOLEDO facility that has been audited and registered according to international (ISO 9001) quality standards.

For questions on concrete deck truck scales and technical matters, call your authorized METTLER TOLEDO distributor. Or visit our website: www.mt.com.
